Build A RECYCLING TRUCK

RECYCLED Art Project
LEVEL: HARD

What You'll Need:

1 Ask an adult to help with cutting.

Cut 1/3 off the top of cereal box.

2

Cut the top piece into 3 pieces. Make one piece LARGER than the other two.

3

Flip over the LARGER piece and slide under the front of other box piece to make the CAB of truck. Secure with tape.

4

Flatten tube. Cut into 3 pieces.

5

Cut each tube open. Roll up each tube tightly so just your thumb can fit inside. Secure with tape. These will be your axel mounts.

6

Tape each of your axle mounts onto the bottom of carton. Put one near the front and two near the back.

7 **WHEELS**

Cut out the wheel pattern and trace 6 wheels onto cardboard. Cut them out.

TIP: If you want thicker wheels, use thicker cardboard or glue wheels together.

8

Draw 2 crossing lines to help find the center of wheel. Ask an adult to help poke a hole through the center of each wheel.

9

Cut 2 small slits in ONE end of the 3 straws.

10

Insert end of straw through hole in wheel. Fold down the ends of straw. Staple the ends down to wheel.

REPEAT WITH OTHER 2 WHEELS.

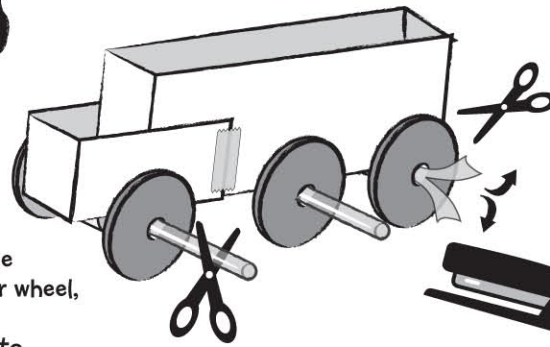

Think About It!

- Why are each of the 3-R's (Reduce, Reuse, Recycle) equally important to a happy Earth?
- What foods do you eat that have packaging you can recycle?
Hint = berry cartons, cereal boxes, etc.
- How can you help to reduce packaging waste from your answer to #2?
Hint = reusable shopping bags, reusable produce bags, refillable containers for bulk bins, etc.

RECYCLING TRUCK

PAGE 2

11

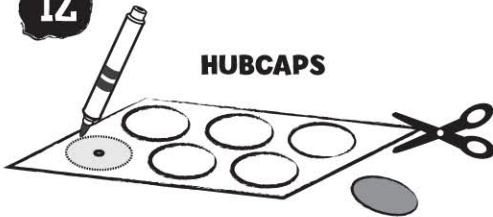

Make 2 cuts in the end of straw, fold down ends and STAPLE.

REPEAT WITH OTHER WHEELS.

Insert open end of straw through the axle mounts. Slide on other wheel, Cut extra straw off. *Leave enough straw to attach other wheel.

12

HUBCAPS

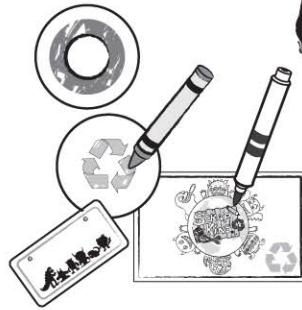

Cut out the hubcap pattern and trace 6 hubcaps onto paper. Cut them out and color them.

Cut out license plate and Sign. Color and decorate.

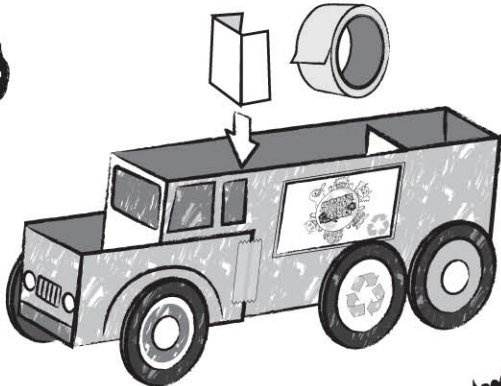

You can also cut shapes from colored paper!

13

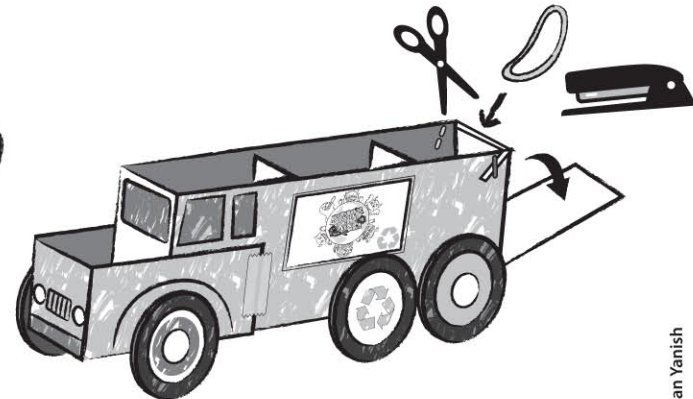

Glue or tape your hubcaps, sign, license plate, & other designs onto the truck.

14

Tape the 2 extra box pieces inside the truck to divide your recyclables.

15

Cut the back of truck along corners to make a gate. Cut open a rubber band and staple it across the back of truck at the top to hold gate closed.
